Re: Reference for Southern Turf Management

The Prince's Grant Homeowners' Association outsourced the maintenance of its 18-hole championship golf course on the Prince's Grant Coastal Estate to Southern Turf Management in June 2012. The transition went extremely well and Prince's Grant benefitted over the year that ensued from excellent service delivery from the company.

The procedures implemented by Southern Turf Management were impressive ensuring impeccable management of staff personnel, consistent service and record keeping of all golf course machinery and equipment, including monthly reports being provided and regular audits being conducted. Their dedication and passion for their business shows through our golf course.

Since the initial appointment of Southern Turf Management in 2012, Prince's Grant has, last year, renewed its contract with them for the second time.

We constantly receive compliments about our beautiful golf course from visitors from all over the world and would not hesitate to recommend Southern Turf Management to any establishment for the maintenance of their golf course.

Should you have any further queries or require further information, please do not hesitate to contact me.

Yours sincerely

Roelf du Toit
General Manager
Prince's Grant Homeowners' Association
